

Conference Theme: *'Environmental Exposures in a Changing Climate'*

Preconference Training Workshops

1	<i>Children's Environmental Health</i>	In general, children receive a higher “dose” of toxicants in a given environment, are less able to neutralize toxicants and live long enough for diseases with long latency periods to manifest. This workshop will cover the principles underlying the vulnerability of children and will highlight risks in specific environments. This workshop is part of a series organised by staff from the Network of WHO Collaborating Centres for Children's Environmental Health at previous PBC conferences. This workshop provides an opportunity for engagement of a wider audience and additional training with evaluation materials made available to trainees.
2	<i>Integrated Environmental Health Impact and Risk Assessment</i>	To enhance understanding of impact assessment and management based on multiple environmental exposures, it is necessary to understand the integrative impact assessment process. This workshop will discuss how environmental exposures are best assessed within an Integrated Environmental Health Impact Assessment process using “real-world” data from the Pacific Islands. This workshop is part of a series organised by staff from the Network of WHO Collaborating Centres for Children's Environmental Health at previous PBC conferences. This workshop provides an opportunity for engagement of a wider audience and additional training with evaluation materials made available to trainees.
3	<i>Identification of Priority Actions for Regional Collaboration</i>	To share a great insight into the challenges and future needs in conducting effective carbon mitigation policies and activities based on the dynamic networking platform between researchers, policymaker and government-related institutes in Asia-pacific Region

Day 1: 29 August 2022

1345	1400	Pre-conference Training Workshop & Registration		
1400	1530	Integrated Environment Health Impact and Risk Assessment	Children's Environmental Health	Identification of Priority Actions for Regional Collaboration
1530	1630	Opening ceremony Opening address: Speaker from International Organisations (WHO) <i>'The importance of climate resilience solutions'</i>		
1630	1800	Plenary 1: Environmental exposures in the Asia-Pacific region in a changing climate		
1830		Welcome Party		

Day 2: 30 August 2022

0800	0900	Registration		
0900	1030	Plenary 2: Environmental impacts on infectious disease [from 2021 focus meeting]		
1030	1100	Break		
1100	1230	Symposium 1: New trends in air pollution	Symposium 2: Water	Symposium 3: Heavy metals
1230	1330	Lunch - Board of Directors AGM		
1330	1500	Symposium 4: Persistent Organic Pollutants (PCB, dioxins)	Symposium 5: Emerging and re-emerging infectious diseases	Symposium 6: Hazardous waste remediation
1500	1530	Break		
1530	1700	Poster session :		
1700		Student - faculty network session		

Day 3: 31 August 2022

0800	0900	Registration		
0900	1030	Plenary 3: Health effects of plastics exposure across the life span [Minderoo Foundation Session]		

1030	1100	<i>Break</i>
1100	1230	<i>Symposium 7: Microplastics</i>
		<i>Symposium 8: Environmental impacts on cancer</i>
		<i>Symposium 9: Pesticides</i>
1230	1330	<i>Lunch</i>
1330	1500	<i>Plenary 4: The latest issues in climate change and their solutions</i>
1500	1530	<i>Break</i>
1530	1700	<i>Plenary 4: Joint symposium between IERI and WHO CC for Vulnerable Population and Environmental Health</i>
1800		<i>Banquet</i>
Day 4: 01 September 2022		
0800	0830	<i>Registration</i>
0830	1030	<i>Student presentation session :</i>
1030	1100	<i>Break</i>
1100	1230	<i>Plenary 5: Programs to ensure children's wellbeing</i>
1230	1330	<i>Closing Ceremony and Awards</i>
1400	1800	<i>Field Trip</i>
